

## JUST

It means very recently, a short moment ago

For example:

- The build **has just** failed, and I am investigating the issue.
- I can't help you. I've **just started** working on another issue.

---

**JUST** is positioned **between have/has and the Past Participle**.

- In British English, **JUST** is used with the **PERFECT TENSE**.
- In American English the **PAST SIMPLE** tense is often used instead of the present perfect tense.

The build **has just** failed. (🇬🇧 British English – Present Perfect Tense)

The build **just** failed. (🇺🇸 American English – Past Tense)
