PRESENT SIMPLE

The Present Simple is used:

- to describe habits or routines

- to describe facts that are true in general or always true.
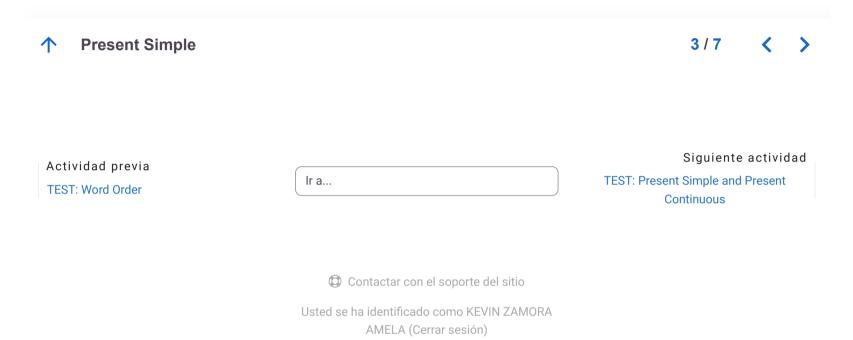

- to express opinions, feelings, or thoughts.

Phrases and adverbs of frequency:

- *Never, Rarely, Hardly ever, Occasionally, Sometimes, Often, Usually, Always.*

- *Every day/week/month/year*

- *Now and again*

- *Every once in a while*

- *From time to time*

EXAMPLES:

- I **check** my emails every morning.

- I **write** code for at least an hour every day.

- I never **skip** unit testing.

- I sometimes **work** from home.

- JavaScript **is** a language that **is** frequently used in web development.

- Git **is** a version control system that developers often **use**.

- Algorithms always **follow** a set of instructions to solve a problem.

- We usually **create** loops to repeat a set of instructions.

- The program always **outputs** a message when it encounters an error.

- The algorithm **sorts** the array in ascending order.

PRESENT CONTINUOUS

The Present Continuous, on the other hand, is used to **describe actions happening right now or temporary situations that are in progress.**

It's also used **to express future arrangements or plans.**

In programming, this tense can be useful to describe **actions that are currently happening or will happen in the future.**

SUBJECT + am/is/are + V-ing

- *"The function is currently running."*

- *"We are meeting to discuss the project tomorrow."*

Time expressions with **Present Continuous:**

- **Now**: *I am typing this document now.*

- **Currently**: *I am currently using my computer for work.*

- **At the moment**: *At the moment, I am playing a video game on my computer.*

- **Today/this week/month/year:** *I am feeling a bit tired today.*

- **These days:** *These days, I am using my computer more often for video conferencing.*

- **Right now:** *I am checking my emails on my computer right now.*

EXAMPLES:

- *I can't talk right now. I'm debugging a program.*

- *I'm currently learning a new programming language.*

- *The team is working on a new feature for the website this week.*

- I*'m using* Python for this project, but I usually code in Java.

- The number of bugs in the code **is decreasing day by day.**

- The programming industry **is constantly evolving**.

- We **are meeting** with the client **tomorrow** to discuss the project requirements.

- I*'m not feeling* well **these days** because I'm working long hours.

- It*'s raining* outside, so I*'m coding* from home **today**.

STATIVE VERBS

Non-action or stative verbs cannot be used in the present continuous tense.

They must be used **in the present simple tense.**

- *I **understand** the problem and I'm working on a solution.* (understand is a stative verb)

- *This program **belongs** to our company.* (belong is a stative verb)

- *The team **thinks** that we need more time to complete the project.* (think is a stative verb)

- *The software **has** several new features.* (have is a stative verb)

- *I **prefer** using text editors for coding.* (prefer is a stative verb)

- *The program **seems to be** running smoothly.* (seem is a stative verb)

- *I **agree** with your solution*. (agree is a stative verb)

- *The website **depends** on the server's response time.* (depend is a stative verb)

- *This error **means** that we need to update the algorithm*. (mean is a stative verb)
