1st term mark: 8,3

Tasks (20%): 7,875 = 1,575 / 2

Task 1: 7,75

Task 2: 8

Exams (80%): 8,41 / 10 -> 6,73 /8

Use of English (40%): 34 /40
Reading: 15 /20
Listening: 18,6 / 20
Writing: 16,5 / 20

Vocabulary: 4 / 4

You have effectively used a wide range of technical vocabulary related to computers, AI, IoT, the Cloud, and The Metaverse."analogical alternatives" ("analogical" is not commonly used in this context)-> "analog alternatives" or "traditional alternatives."

Spelling: "as A result"

Grammar: 3,5 / 4

Be careful with singular / plural conjugation:

"these devices are our modern society's core and **it** enable" -> "It enableS" OR "they enable" (depending on what you focus: these devices or the whole action)

"AI or **another useful technology** such as data analysis and customer support" -> this could be rephrased to "AI and other technologies, such as data analysis and customer support systems." (everything plural)

"Would have never developed" better "would never have developed."

Most of the sentences are well-constructed, but some sentences feel a bit long or could be clarified. Breaking down some of the more complex sentences could improve readability. For example: "In a world without computers, many daily tasks would become much more challenging significantly" could be simplified to "In a world without computers, many daily tasks would become significantly more challenging."
The sentence "In a world without computers, many daily tasks would become much more challenging **significantly**" is a bit awkward due to the placement of "significantly. -> "In a world without computers, many daily tasks would become **significantly** more challenging" (more fluid and easier to understand.)

Content: 4/ 4

The structure of the blog post is clear and organized.

Structure: 3,5/4

In some parts, your ideas are not always clearly segmented, and there could be more subheadings or clearer paragraphing. Each paragraph addresses a separate idea, but some could be broken down further to avoid dense sections. For example, in the third paragraph, the sentence structure could be improved by splitting it into more concise statements.

Cohesion: 3, 5 / 4
You use basic connectors like "but," "and," and "in consequence." You should aim to incorporate more advanced connectors such as "nevertheless," "furthermore," and "consequently," which would provide smoother transitions and improve the cohesion of the text.
